Managed Services - Field Support Operations Requirements

- The experience of last four years handling the Field Support Operations for telecom networks across Africa indicates the workforce has to be;
 - Flexible
 - Experienced
 - With Knowledge

- How can we help them?

Managed Services - Field Support Operations

Holistic Understanding

- The ways of working should be redefined building-up a new working model and setting up a professional centre with specific staff, focused on the operational view on ground with good skills.
- From a holistic point of view, the dispatch is a set of tools, processes and governance.
- The objective pursued is to maximize productivity, monitor daily operations and reduce costs.

Holistic Understanding

Managed Services – Central Dispatch

Definition and Mission

Contact point between Front Office Monitoring and Field Technician for all Work Orders related.

- Dispatch acts as a support function for all field activity and ensures that the field forces are routed and loaded properly to maximize utilization and productivity.
- The Dispatch job role works closely with multiple field-based job roles and schedules or adjusts work assignments for field personnel. Dispatch personnel assign and expedite work orders and the field technicians perform the actual tasks.
- Dispatchers will also ensure that WOs are sent to the right recipients.

Managed Services - Central Dispatch

What we have done in Lagos (Nigeria)

- As part offshoring plan in Managed Services across Africa, to lead the start-up and project implementation of Central Dispatch for MTN and Airtel in Lagos (Go Live reached 3rd August 2015), available on 24/7 with 30 staff on shift rotation attending 300 field technicians.
- Convert the Central Dispatch in Lagos into a hub of work order management to field technicians for MTN South Africa (Go Live reached 3rd December 2015) and Anglophone West African countries; Smile Nigeria, Tanzania and Uganda on 1st May 2016.

Managed Services – Central Dispatch

Benefits

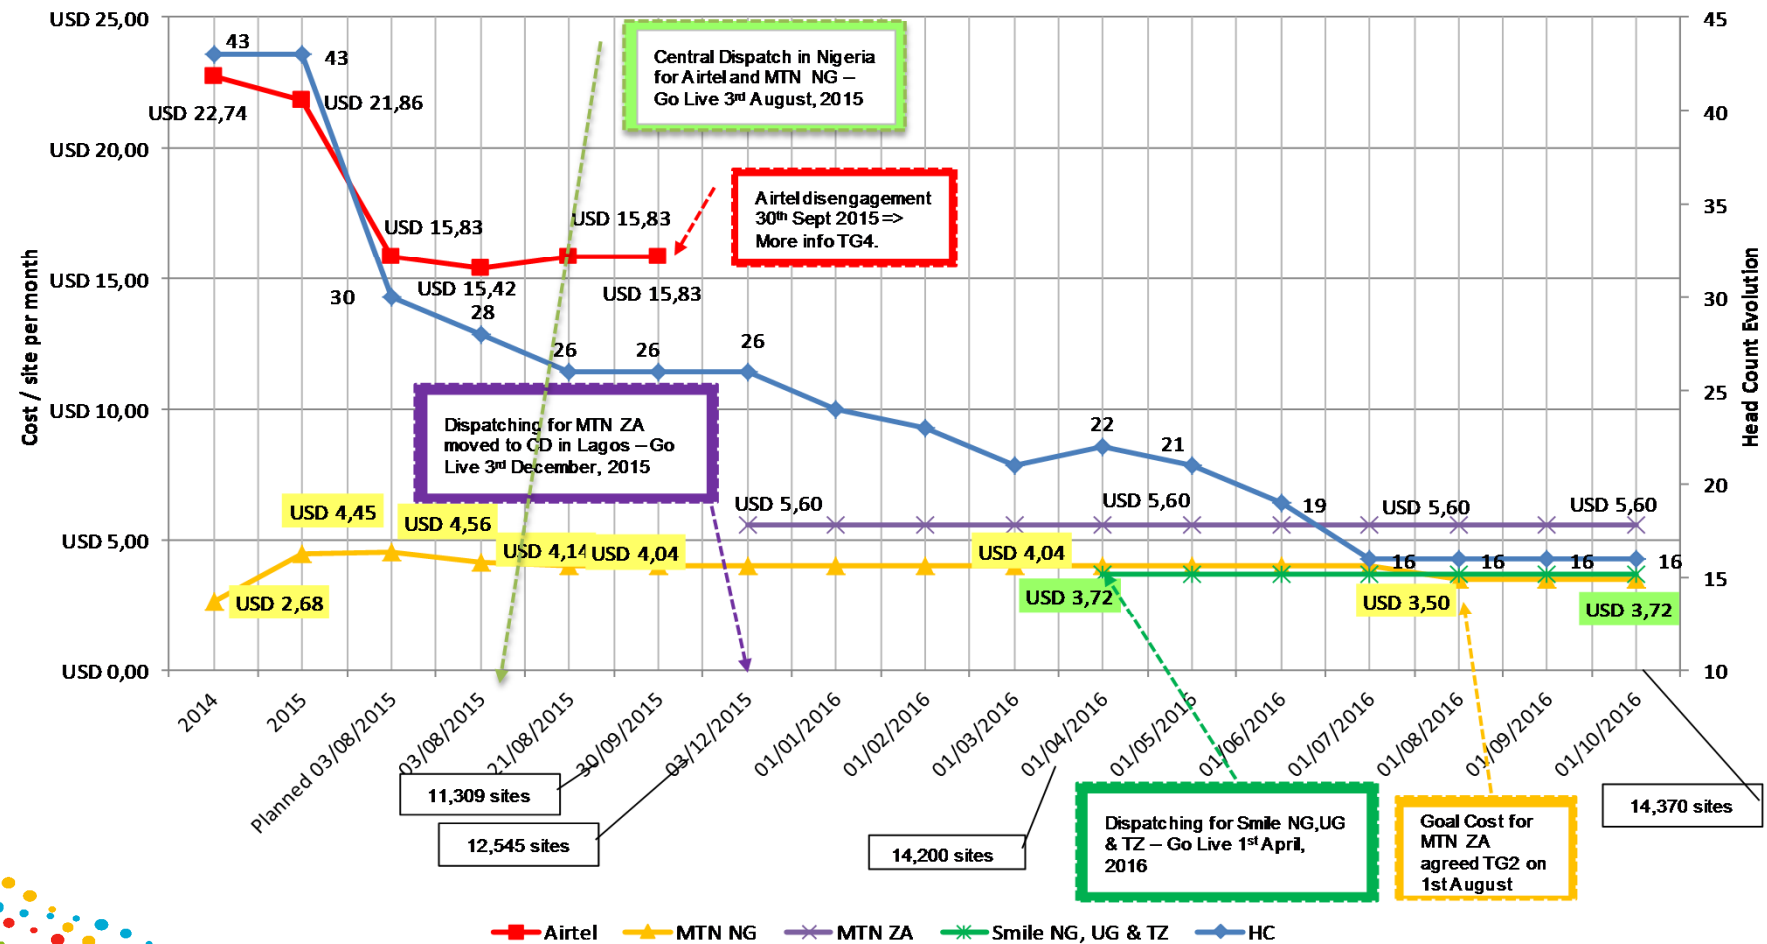

- Consistency in decision making and implementation of policies and methods → *Same Ways of Working across Africa.*
- Eliminates duplication and reduce operating costs of decentralization → *Head Count reduction.*
- Fast execution → *It's quicker to include new customers in a structure created than to create an organization from scraps each time*
- Control and accountability → *A single governance model across Africa assure the data tracking.*

Managed Services - Central Dispatch

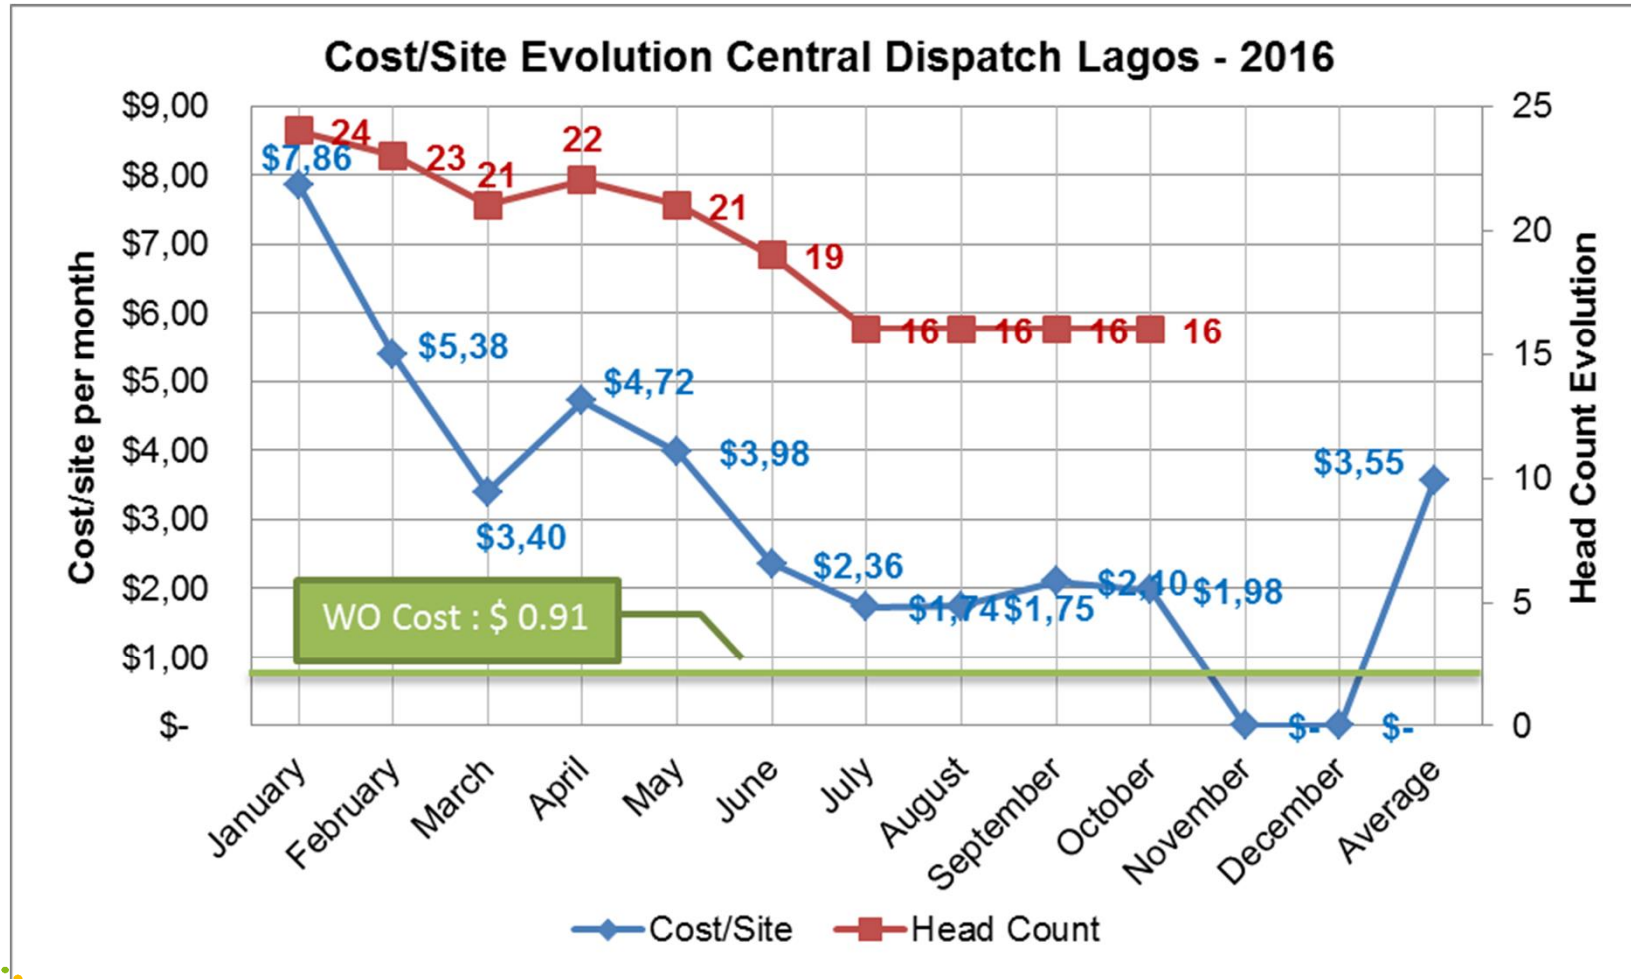

We have done headcount optimization and cost reduction (1/2)

Central Dispatch Benefits Evolution 2015 - 2016

Managed Services - Central Dispatch

We have done headcount optimization and cost reduction (2/2)

Managed Services – Central Dispatch Findings (1/2)

- We have created synergies between operations by minimizing the number of dispatchers.
- For this we have created a set of processes based on MSTOP – Managed Services Total Operations Practice as;
 - “ Work Orders Handling
 - “ Checklist Dispatcher & Hand Off Process
 - “ Area of Responsibility (AOR) of each Dispatcher
 - “ Escalation Process & Operational Process Instruction.
 - “ Business Continuity Plan
 - “ Job Descriptions
 - “ Behaviour Rules

Managed Services – Central Dispatch Findings (2/2)

- A way of following the Dispatcher Performance Control has been putting on place with the measurement of:
 - “ Time to Dispatch
 - “ Ticket update and team effectiveness
 - “ Measure of escalation process adoption.
 - “ Corporate core values approach
- The Managed Services Chief Operating Officer’s resistances of losing control in activities which in many cases they are not good understood.

Managed Services – Central Dispatch

Lessons Learned

MC Talent
Project Management

Kruger Park – 28th August 2016

Managed Services - Central Dispatch Lessons Learned (1/3): Suitable Enterprise Resource Planning vs. Set of Tools

Workforce Management (WFM) is a software package designed to assist large service organizations with managing their field service work force.

Click Mobile (CT) is a thick client that is being installed on the PDA.

Service Optimisation Tuning (SOT) is a Automatic Scheduling of Work Orders to Field Technicians and continuous schedule optimization, as well as, Dispatching of Work Orders to Field Technicians.

Maintenance Activity Reporting System (MARS) is a global tool for maintenance operations. Built on a database engine it provides Request Management, Change Management and Trouble Management capabilities.

Suitable Enterprise Resource Planning versus Workforce Management (1/2)

Workforce Management (WFM) is a software package designed to assist large service organizations with managing their field service work force.

It's focus is on efficient planning and control of the available time of the field organization.

Implementing WFM will drive changes in how the organization manage implementation, provisioning, corrective, planned and preventative maintenance across operations and field.

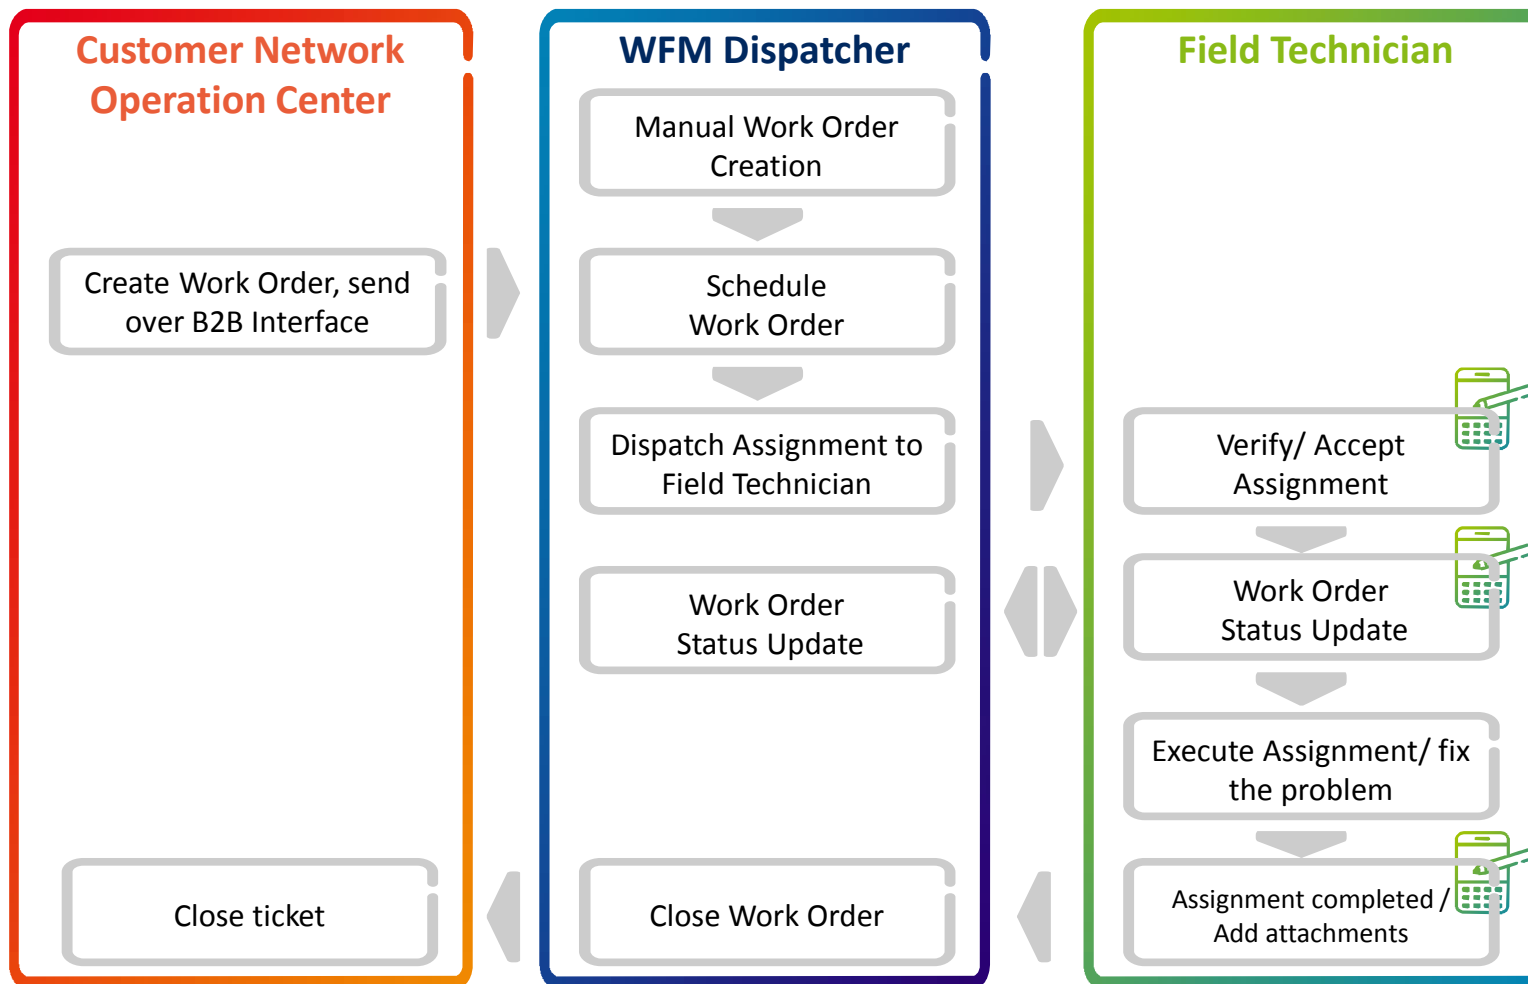

It's a standardized global approach across all Field Operations markets.

It's a core scheduling tool that can be integrated with TM and back to the customer trouble ticketing system.

Suitable Enterprise Resource Planning versus Workforce Management (2/2)

Suitable Enterprise Resource Planning versus Click Mobile

Enables the field force to interact with the ClickSchedule application using a handheld mobile device.

Click Mobile is a thick client that is being installed on the PDA.

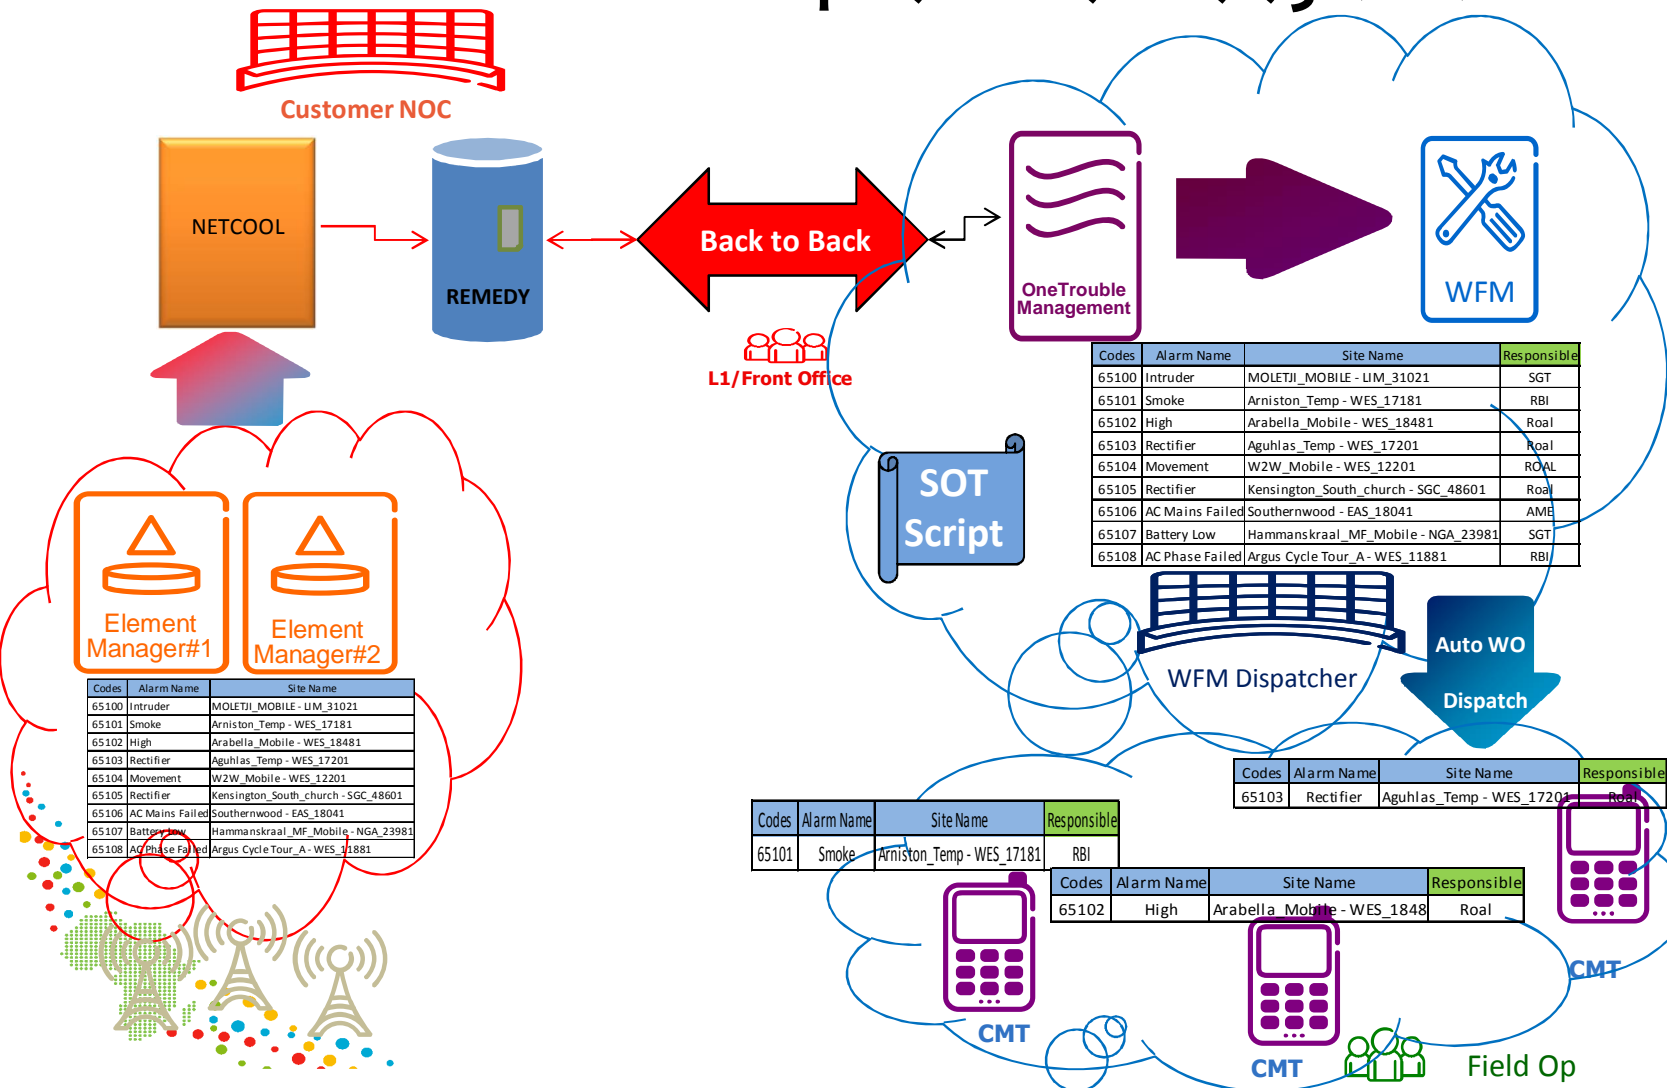

Field Technicians can retrieve information on the work orders to which they have been assigned.

Field Technicians report back progress of the work being performed using Click Mobile.

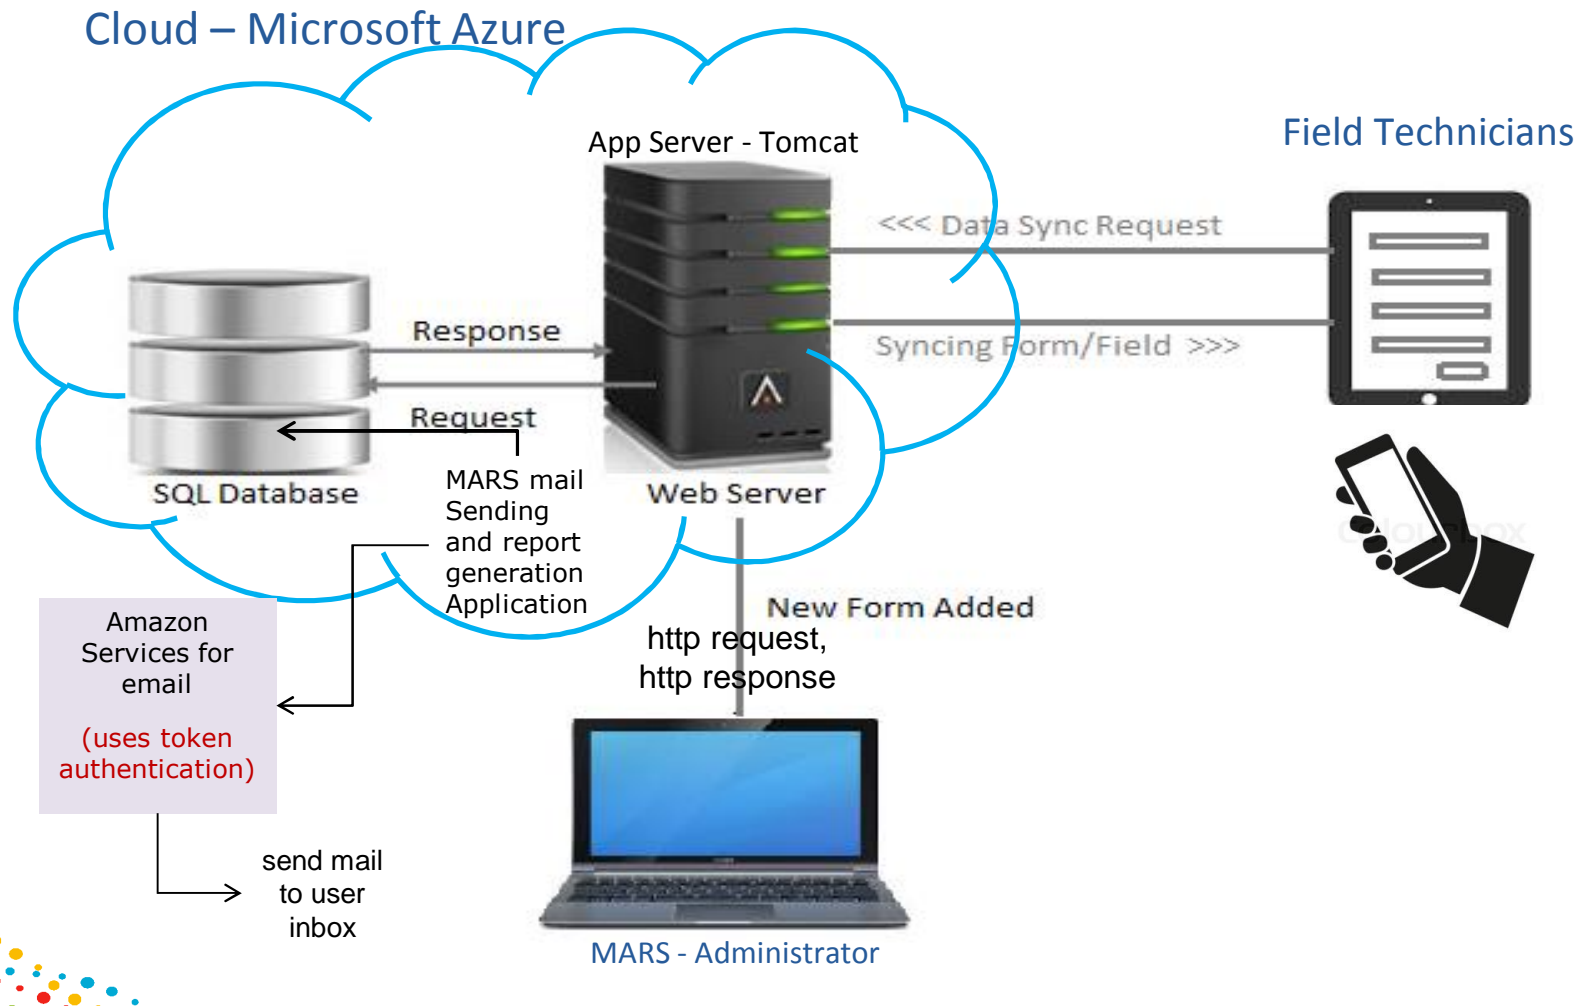

Customer details, job description, and other data can be accessed directly from the mobile client.

Suitable Enterprise Resource Planning versus Service Optimisation Tuning (1/2)

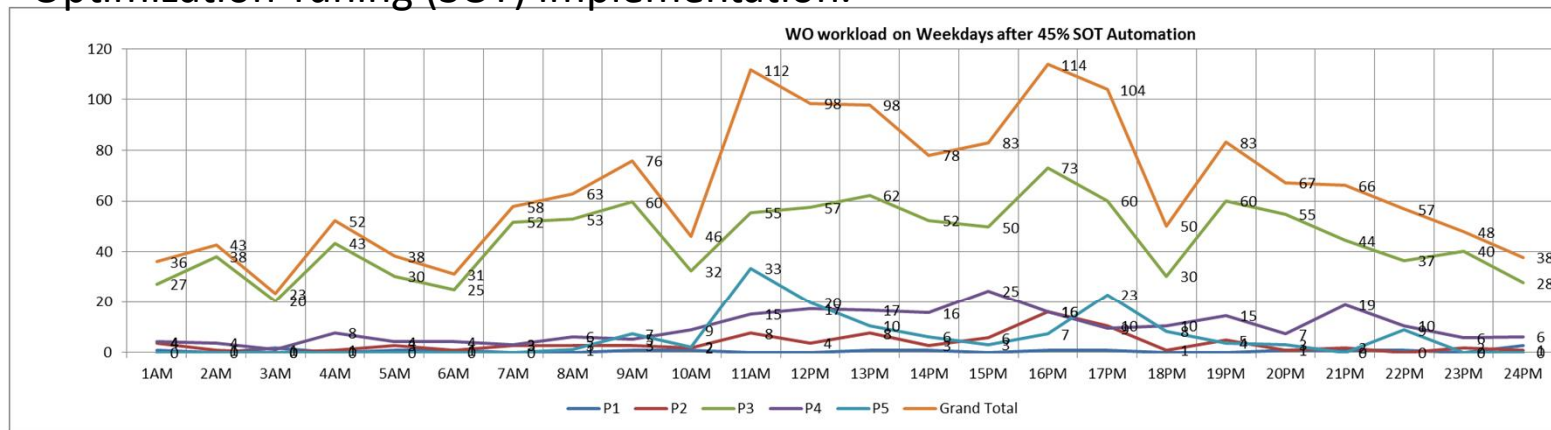

Suitable Enterprise Resource Planning versus Maintenance Activity Reporting System

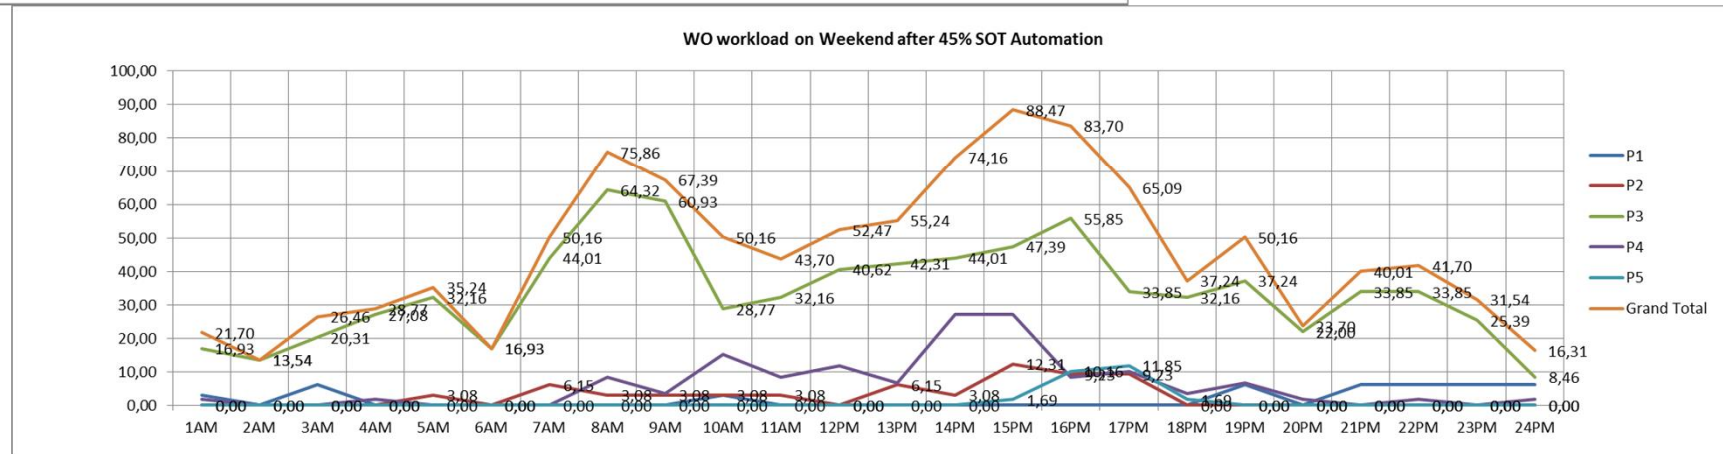

Managed Services - Central Dispatch Lessons Learned (2/3): Perform Proper Dimensioning (1/2)

To perform a proper dimensioning of the Central Dispatch, the requirements include the number of WO by priority and timeslot, as well as, the automation level expected by Service Optimization Tuning (SOT) implementation.

	Days					
	22	8	30			
	Mo to Fri	Sa - Su	Week	Mo to Fri	Sa - Su	
	80,00%	20,00%	100,00%			
WO/Month Airtel	14.811	11.849	2.962	14.811	539	370
WO/Month MTN	61.014	48.811	12.203	61.014	2.219	1.525
Total	75.825	60.660	15.165	75.825	2.757	1.896

Managed Services - Central Dispatch Lessons Learned (3/3): System Reporting vs. Dashboard (1/4)

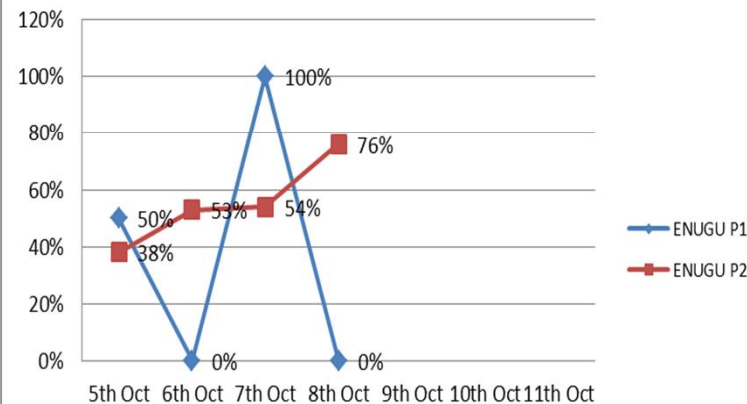

It is very important to create a good Reporting System – Dashboard - in order to analyse trends, workloads and discover operational problems.

Overview of Regional WO Fulfillment

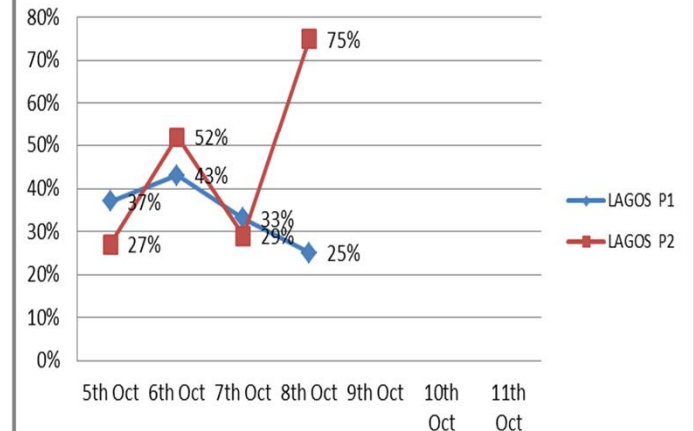

PHC WO Performance (WK. 41)

Enugu WO Performance (WK. 41)

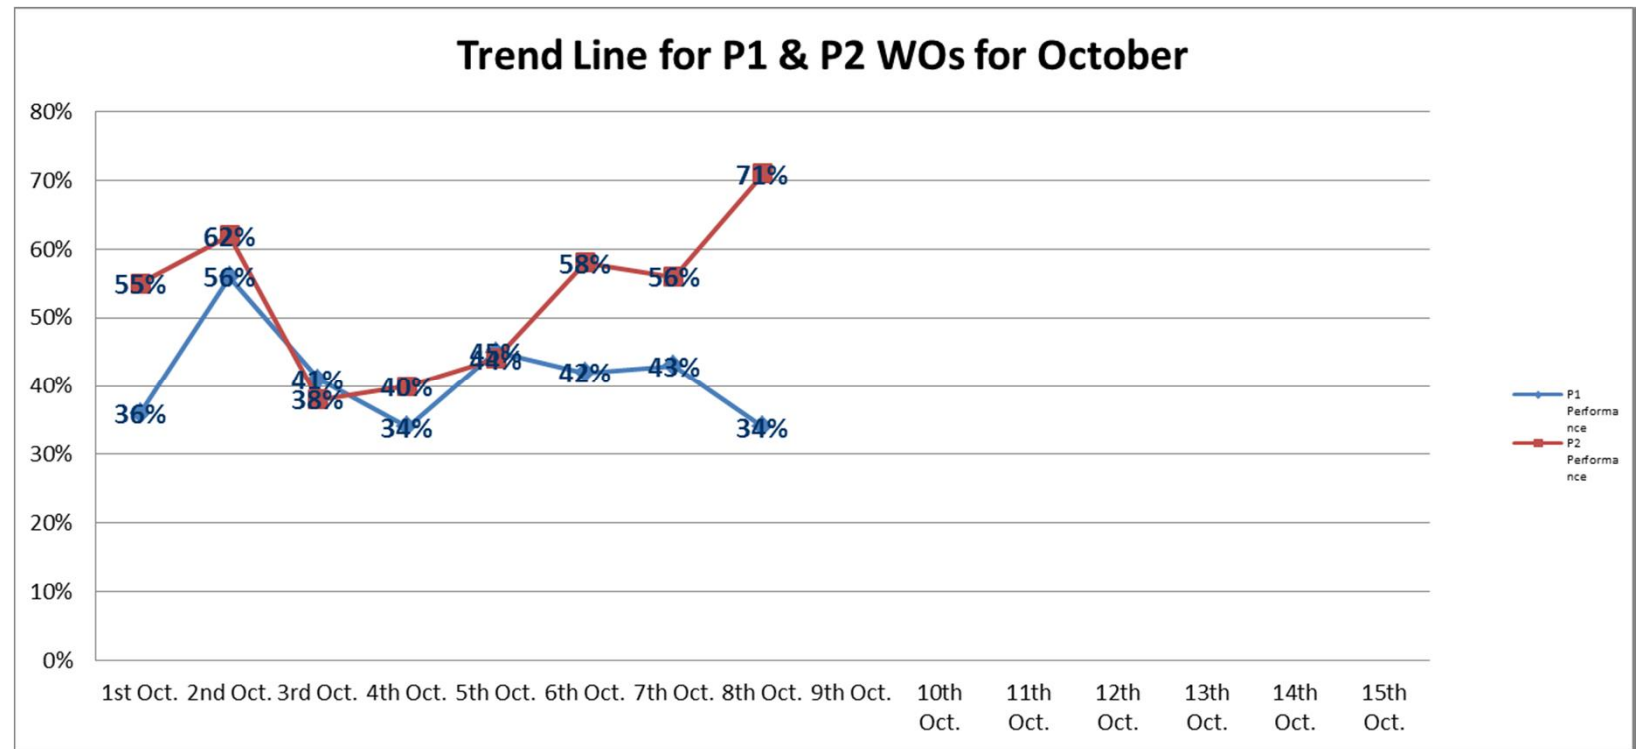

Lagos WO Performance (WK. 41)

Managed Services - Central Dispatch Lessons Learned (3/3): System Reporting vs. Dashboard (2/4)

The way forward

Managed Services – Central Dispatch

Next Steps

- Based on the know-how gained in the implementation and organization of the Central Dispatch in Nigeria, a similar structure as hub should be created for all Francophone West African countries.
- As first step the dispatch activities for MOOV Côte d'Ivoire, Togo and Benin should be centralized in Abidjan.

Managed Services – Central Dispatch Next Steps

Why is feasible?

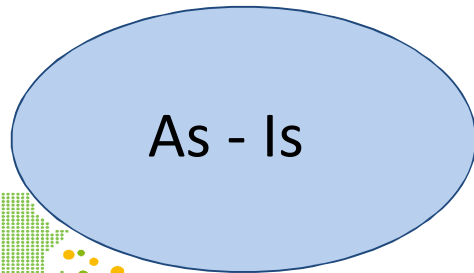

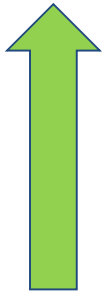

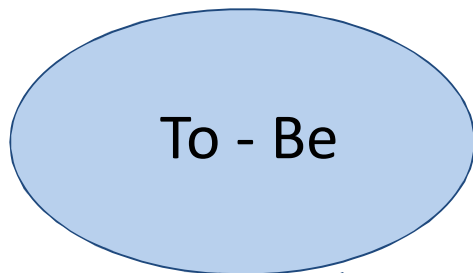

- *Implemented a common blueprint across Africa.*
- *Creation of a solid hub in Abidjan for MOOV customers in western Africa, according to the contract requirements.*
- *Better usage of Set of Tools.*
- *Savings 8 Head Count.*

1. Dispatch activities in Abidjan with 2 Resources only during 12 hours per working days.
2. During the rest of the day and week end, Front Office in Abidjan will assume the responsibility to dispatch WOs on a best effort basis.

Dispatch activities in Abidjan (3 HC), Benin (5 HC) and Togo (5 HC) = 13 HC.

As - Is

To - Be

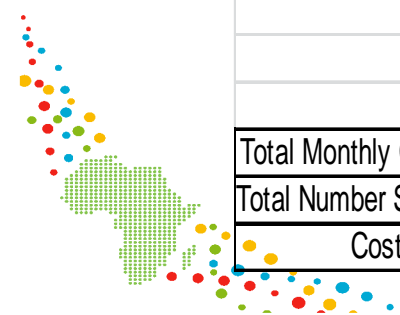

Managed Services – Central Dispatch Next Steps

Clear Savings

The new set-up achieves 2.31 USD / site, providing 10.21 USD (81.56%) per site of savings.

	Dispatch Activities splitted per countries							
	Côte d'Ivoire	Togo	Benin	Total				
Total Monthly Cost	10,436.15 USD	8,882.18 USD	7,481.81 USD	26,800.14 USD				
Total Number Sites	1,279	343	518	2,140				
Cost/site	8.16 USD	25.90 USD	14.44 USD	12.52 USD				
	Central Dispatch in Abidjan with 5 ARPs at 24/7							
	Côte d'Ivoire	Togo	Benin	Total				
Total Monthly Cost				9,535.84 USD				
Total Number Sites	1,279	343	518	2,140	Savings			
Cost/site				4.46 USD	8.07 USD	64.42%		
	Central Dispatch in Abidjan with 2 ARPs						Additional savings due to only 2 ARPs	
	Côte d'Ivoire	Togo	Benin	Total			2.15 USD	17.14%
Total Monthly Cost				4,942.39 USD				
Total Number Sites	1,279	343	518	2,140	Savings			
Cost/site				2.31 USD	10.21 USD	81.56%		

From **BC MOOV_TG2_v1.0.xls**
(Content of sheet BC / cell D16)

MC Talent
Project Management

-

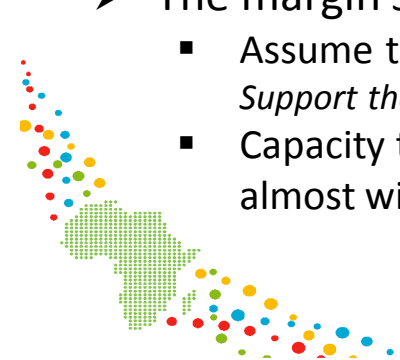

*HC Savings in Terms of Company will be **8 ARPs***

Managed Services – Central Dispatch Next Steps

Room to include more Anglo Customers

				Central Dispatch HC - Abidjan						
Total (Manual & Auto) WO per week				Mo to Fri			Sa - Su			
Mo to Fri	Sa - Su	Total	Automation	Morning	Evening	Night	Morning	Evening	Night	
952	223	1,175	50.00%	0.69	0.37	0.45	0.22	0.33	0.30	
This HC is obtained from HC dimensioning tool. It is not arithmetic addition from total columns					# HC (15 WO Dispatched/hour)			2.25		
WO / hour per person				15	Dispatcher					
Legal annual hours:				1,760	Mo to Fri			Sa - Su		
Productivity rate:			97%	Morning	Evening	Night	Morning	Evening	Night	# ARPs
				1	1	1	1	1	1	5.13

- The minimum staff per shift is one dispatcher ➔ Recruit 5 ARPs
- The margin surplus will be used to:
 - Assume task as Team Leader (Daily accountability of operational KPI's, High level escalation management, Support the Dispatch Centre Manager, Reporting).
 - Capacity to include others customers (MOOV – Niger, Tigo – Senegal, **Orange – Mali & Cameroon**) almost without HC increase.

How was the journey?
